DESCRIPTION

3 rolls are driven - direct transmission

hardened rolls

digital readout

conical bending

permanent lubrication

> Planetary movement: reducing contacts and frictions between the parts to a minimum improving the bending performance

> Direct transmission: gearboxes coupled to the rolls, bearings and

hydraulic motors to reduce energy consumption and improve dragging power

> Permanent lubrication: all components are pre-lubricated and sealed for life

> Rolls cambering: bi-conical shaping to avoid barrel or spool effect

> Movement control and roll parallelism
