DECOILING + / OR ROLL FORMINGLINES

Manni / Cannon polyurethane press for sandwich panels

Brand: Manni / Cannon · Type: polyurethane press for sandwich panels

TECHNICAL SPECIFICATIONS

Specifications on request.

DESCRIPTION

Panels for thermal insulation of industrial buildings

Sectional door panels **(current configuration)**

Panels for residential roof insulation

Manni trolley press 2+2

The hydraulic closed die press (2+2) is the optimum solution in terms of productivity and plant layout. Independent motorized tables allow one sandwich panel to be prepared while another panel is curing in the press, significantly reducing production downtimes.

- 4 tables
- table dimensions: 9500 x 1600 mm
- maximum opening: 150 mm
- each cycle produces 4 sandwich panels, **24-40 panels per hour**

Manni manipulator for automatic loading and unloading + stacking of finished panels

Maximum workpiece weight: 700 kg

Polyurethane dosing unit Cannon A-Compact HF

The injection is done on both sides of the Manni press

Designed for the processing of polyol blends with solid fillers (RRIM)

Jacketed and insulated tanks with level control and automatic filling with special stirrer for solid fillers

Recycle power distributors

Digital low/high pressure gauges

Hybrid dosing system: piston pump for isocyanate, hydraulic cylinder specially designed by Cannon for filled polyol

Closed-loop automatic output and ratio adjustment and control

Touchscreen control panel

Calibration of each component directly via the mixing head

400V – 50Hz – 118 amps – 66 kW

Required space : 25 meters x 16 meters x 4.16 meters
