Automatic Spinning, Flow Turning and Necking-in Machine

LIEFELD APED 350

Leifeld's many years of experience in the manufacture of automatic machinery are incorporated in the design of this newly developed lathe. Special importance has been attached to the lathe being able to cope with the heavy demands of series production on an industrial basis and to guarantee high repeat accuracy of the machine settings in the interest of short setting-up times.
Special features of the lathe include:
The cross slide supported over its entire length at the rear of the lathe; longitudinal feed by hydraulic cylinder with a very accu-rate, viscosity-independent, infinitely variable speed control, infinitely variable contact pres-sure for easy matching to various materials with their different properties; the bed block for the slide vibration-free and extending down to the floor; the numerous attachments available for the lathe, where equipment for special purposes can be developed by the user if required; with mobile control console or fixed control panel.

Technical Data:

Center height	mm 350
Distance between centers	mm 900
Bed length	mm 2200
Tool mounting using centering flange	DIN 55022, Size 8 or 6
Speeds of main spindle infinitely variable	rpm 280-2300
Drive rating	kW 4
Drive rating of hydraulic unit	kW 7,5
Tailstock sleeve travel	mm 500
Ejektor stroke	mm 200
Longitudinal travel of slide	mm 300/400
Transverse travel of slide	mm 275
Longitudinal thrust	kN 14
Transverse thrust	kN 18
Approx. net weight	kg 3400

WYOBLARKI

Centerheight	**350 mm**	Distance between centers	**900 mm**
Worklength	**2200 mm**	Longitudinal travel X-axes	**400 mm**
Cross travel Y-axes	**275 mm**	Tail-stock travel	**500 mm**
Ejection-pin travel	**200 mm**	Speeds	**A 200-600 rpm**
Admission in spindlenose	**M 60, DIN 800**	Voltage	**380 V**

OPIS

sr 29512-19/10 -- Snelheden : Positie B 585 - 1800 rpm
